

## Tin Can Kits

This presentation will cover what Tin Can Kits are, and how to set one up.

There are

The things we have here today to start your tin can kit:

One of the cordages I mention. This one is reflective at night so you can see it easily. It is wrapped and tied around the tin to keep the lid on. It can be used to help make a shelter, carry things, and so many other things you will learn.

A water resistant mini-booklet with some information to remind you what or how to do some things that can be difficult to remember.

A whistle so you can signal for help.

There is a small can opener in case you have some canned food with you but no other can
